

66°33 Arctic Industrial Solutions

Company Profile

Industrial Supervision - Piping Prefabrication - Pressure Testing - Project Support

Company Overview

66°33 Arctic Industrial Solutions provides practical industrial supervision and project support for demanding onshore, offshore, refinery, shipyard and fabrication environments. The company is built on more than 20 years of hands-on field experience, supervision, piping coordination, pressure testing, mechanical completion support and QA/QC work across Norway and Europe.

Core Capability

Industrial supervision and site coordination

Piping prefabrication and mechanical work follow-up

Pressure testing, flushing, chemical/oil cleaning support

Flange work, bolting and test package support

QA/QC awareness, HSE discipline and documentation control

Company Details

Founder: Szymon Stepinski

Organization number: 937 647 468

Base: Norway / EU

Website: www.6633ais.com

Email: szymon.stepinski@6633ais.com

Positioning

- Independent industrial support for contractors, project teams and industrial clients.
- Strong practical background from fabrication, refinery, shipyard, power plant, carbon capture and offshore-related projects.
- Focus on safe execution, planning discipline, practical leadership and reliable project delivery.

Service Areas

Industrial Supervision	Crew leadership, work planning, progress follow-up, coordination with client representatives and practical site problem solving.
Piping Prefabrication	Support for piping fabrication and prefabrication activities, including technical coordination, work organization and quality focus.
Pressure Testing	Preparation, coordination and supervision support for pressure testing, flushing, recording tests, test packages and related documentation.
Mechanical Completion	Practical support for mechanical completion, punch follow-up, system readiness and interface coordination.
QA/QC & HSE Support	Quality inspection mindset, documentation discipline, safe execution and experience from high-standard industrial projects.
Flange Work	Support for bolted flange connections, tightening processes, preparation checks and test readiness.

Technical Strengths

- Piping systems, steel structures, industrial installation and refinery work
- High pressure testing, flushing, recorder handling, high pressure pumps, bolt tensioning and HYTORC equipment
- Flange connections, bolting awareness and practical test execution coordination
- International industrial project experience across Norway, Finland, Sweden, Netherlands, Belgium, Germany, France, Ireland and Poland
- Leadership roles: supervisor, foreman, site supervisor, project manager, QA/QC manager and piping assembly manager

Why Work With Us

- Field-proven supervision in demanding industrial environments
- Practical understanding of what happens on site - not only office-level planning
- Strong communication with client representatives, crews and international project teams
- Flexible project support for Norway, Nordic countries and selected European projects

Relevant Industrial Experience

Selected project experience based on the founder's CV, focused on supervision, coordination, QA/QC and pressure-testing work.

Period	Project / Client Environment	Role / Scope
2025-2026	WNS Pomorze NUF / Aker Solutions - Hugin A, Valhall	Supervisor for offshore platform piping prefabrication, including titanium, 16Mo3, duplex and superduplex piping.
2025	JobTech / IKM Testing - Aker Carbon Capture, Brevik CCS	Supervisor for high pressure pipe testing, flushing, chemical/oil cleaning, pipeline quality inspection and commissioning support.
2023-2024	SGS Emont K.S. - Hydrogen Plant HPU3 / Neste Refinery, Porvoo	QA/QC Manager for Linde Gas Oy hydrogen plant work and refinery TAR/RDO project environment.
2022-2023	Remak-Energomontaz / Metsä Fibre BTT Kemi / Stockholm Exergi	Piping assembly manager and piping supervisor on steam piping, boiler and pipeline modernization works.
2022-2023	Olto Construction - Belgium, Finland, France, Ireland	Project manager across industrial projects including Borealis PDH Kallio, Metsä Fibre Kemi, EDF Cordemais and Radley Engineering mechanical works.
2021-2022	Remak-Energomontaz - Porvoo, Finland / Baltic Pipe, Poland	Piping assembly manager for feed water piping, steam piping, pump stations and gas compressor/transmission infrastructure.
2019-2020	Mostostal Krakow - LKAB Kiruna, Sweden	Site Supervisor for conveyor bridge construction, supporting structures, pipelines, conveyors and insulation systems.
2019	Polimex Mostostal / Naftoremont - BP Rotterdam Refinery	Supervisor for pipeline assembly during TAR 2019 refinery project.
2016-2017	Mostostal Zabrze / Siemens CCGT - PKN Orlen	Pipeline assembly Foreman and pressure testing Supervisor on gas/steam cogeneration unit project.
2015-2016	Constechnik / IKM Testing - Offshore platform FPF1	Supervisor coordinating high pressure pipeline testing, flushing, recording tests, tensioning bolts and HYTORC flange bolting.

Certificates & Competence

- VCA/SCC certificate
- Scandinavian HMS certificate
- Supervision of flange connections certificate - BP
- Operation of high-pressure pumps
- Bolt tensioning and HYTORC equipment operation
- Pressure measurement recorder operation for pipeline tests
- Driving licence category B
